Description

This document describes how to use the IccRequestMaker.

IccRequestMaker

is a Windows program created to allow submitting of Requests.

These requests can be submitted by non-IT users. The requests can then be processed by a elevated IT user.

Installation

- copy the IccRequestMaker.exe to a folder
- have an IT member create a Logic File for your requests
- create a shortcut to the program, with a path to the Logic File

Using

- run the program
- choose a Request Available
- click: Submit Request

Below the 'Submit Request', as set of messages will give information on what the program has done.
