

LCC ADP Pro Modification Student Search Columns

INDEX

Description
Installation
Layout Adjustments

Description

This document describes the LCC Modification to ADP Pro for enhancing the Student Search Columns.

A default installation of ADP Pro provides the following columns when searching for a student:

Last Quarter
SID
Name
Program
Intent

This modification will add the Date Of Birth column to the default results, and two additional pages that show results containing Address and Phones.

During this modification, you will be editing these files:

Just adding DOB to default Student Search

[StudentSearch.aspx](#)

Adding Address and Phones Student Searches

[Default.Master](#)

It is recommended you backup these files, for possible rollback.

It is also recommended you copy these files (after modification), to an alternate location, in case a later ADO Pro upgrade overwrites it.

Installation

To add Date Of Birth to the default Student Search

Edit the file: [StudentSearch.aspx](#) (inside the ADP Pro website folder)

After these two lines:

```
<asp:BoundField DataField="CisSid" HeaderText="SID" />
```

```
<asp:BoundField DataField="StudentName" HeaderText="Name" />
```

Add this line:

```
<asp:BoundField DataField="Birthdate" HeaderText="DOB" />
```

[if you only want to add the Date Of Birth column, you can stop here]

To add Address and Phones Student Searches

- copy [StudentSearch.aspx](#) to [StudentSearch-Address.aspx](#)

- copy [StudentSearch.aspx](#) to [StudentSearch-Phones.aspx](#)

Edit the file: [StudentSearch-address.aspx](#) (inside the ADP Pro website folder)

Replace these lines:

```
<asp:BoundField DataField="Birthdate" HeaderText="DOB" />
<asp:BoundField AccessibleHeaderText="Enrolled Program"
DataField="EnrolledProgram" HeaderText="Program" />
<asp:BoundField AccessibleHeaderText="Student Intent" DataField="StudentIntent"
HeaderText="Intent" />
```

With these lines:

```
<asp:BoundField DataField="AddressStreet" HeaderText="Street" />
<asp:BoundField DataField="AddressCity" HeaderText="City" />
<asp:BoundField DataField="AddressState" HeaderText="State" />
<asp:BoundField DataField="AddressZip" HeaderText="Zip" />
```

Edit the file: [StudentSearch-phones.aspx](#) (inside the ADP Pro website folder)

Replace these lines:

```
<asp:BoundField DataField="Birthdate" HeaderText="DOB" />
<asp:BoundField AccessibleHeaderText="Enrolled Program"
DataField="EnrolledProgram" HeaderText="Program" />
<asp:BoundField AccessibleHeaderText="Student Intent" DataField="StudentIntent"
HeaderText="Intent" />
```

With these lines:

```
<asp:BoundField DataField="DayPhone" HeaderText="DayPhone" />
<asp:BoundField DataField="EvePhone" HeaderText="EvePhone" />
```

Edit the file: [Default.Master](#) (inside the ADP Pro website folder)

After these two lines:

```
<a class="link1" href="StudentSearch.aspx">Name / SID / Advisees</a><br />
```

Add this line:

```
<span style="padding-left:15px"><a class="link1" href="StudentSearch-
Address.aspx">show Address</a></span><br />
<span style="padding-left:15px"><a class="link1" href="StudentSearch-
Phones.aspx">show Phones</a></span><br />
```

Layout Adjustments

Thank you to Justin Heiner from Whatcom Community College for these suggestions.

Edit the file: [StudentSearch.aspx](#) (inside the ADP Pro website folder)

(and any other search pages, like StudentSearch-Address.aspx, StudentSearch-Phones.aspx, etc..)

Change DOB Value Format

Edit this line:

```
<asp:BoundField DataField="Birthdate" HeaderText="DOB" />
```

Edited line:

```
<asp:BoundField DataField="Birthdate" HeaderText="DOB"  
DataFormatString="{0:d}" />
```

Change Div Width

Edit this line:

```
<div class="data1">  
<br />  
<div style="margin-left:45px">
```

Edited line:

```
<div style="margin-left:5px;margin-right:5px">
```

Change Advisee GridView Width

Edit this line:

```
<asp:GridView ID="GridView_Students" runat="server"  
BackColor="LightGoldenrodYellow" BorderColor="Tan" BorderWidth="1px"  
CellPadding="3" ForeColor="Black" GridLines="Horizontal"  
AutoGenerateColumns="False" Width="90%">
```

Edited line:

```
<asp:GridView ID="GridView_Students" runat="server"  
BackColor="LightGoldenrodYellow" BorderColor="Tan" BorderWidth="1px"  
CellPadding="3" ForeColor="Black" GridLines="Horizontal"  
AutoGenerateColumns="False" Width="100%">
```

Change Older Advisee GridView Width

Edit this line:

```
<asp:GridView ID="GridView_OlderAdvisees" runat="server"  
BackColor="LightGoldenrodYellow" BorderColor="Tan" BorderWidth="1px"  
CellPadding="3" ForeColor="Black" GridLines="Horizontal"  
AutoGenerateColumns="False" Width="90%">
```

Edited line:

```
<asp:GridView ID="GridView_OlderAdvisees" runat="server"  
BackColor="LightGoldenrodYellow" BorderColor="Tan" BorderWidth="1px"  
CellPadding="3" ForeColor="Black" GridLines="Horizontal"  
AutoGenerateColumns="False" Width="100%">
```
